Description:

Education designed for humans

The Alternative education system

Indulge your curiosity and build

Ideate-express (promise): we are building an alternative education, designed for humans not dogma

Indulge your curiosity and build

The alternative education system designed for humans not dogma

Public sys.

- Paid for by taxation
- compulsory to everyone
- free at the point of delivery

VS

- Paid for by learner
- not compulsory to everyone
- free at the point of delivery

We'll also post
Ken Robinson's video
on the home page

An Alternative Education System

short essay describing our model of
pedagogy in an emotionally engaging way.
The aim will be to craft a short
essay to justify our objective and vision -
essentially why we need an alternative
and what that alternative looks like.

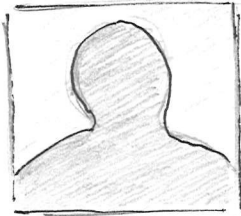

Aim for 2-3 paragraphs max.

Take a note...

Add

Wikipedia.org

a credit default swap is essentially insurance against a credit default

nytimes.com

CDSs cause trouble only when the collateral deposit is too small

Khanacademy.org

A CDS is typically issued by an insurance house like AIG and they derive utility as a result of their risk management functions
